**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling cold at height in the strong winds.

Forecast for Wednesday 05 Apr 2023

Weather: Dry at first overnight but low cloud and rain soon pushing in from the west during the early hours. This lingering across the region throughout the day, heavy at times, particularly into the evening.

Maximum wind: South to southwest 15-20 mph, gusting 30 mph, easing into the evening.

Chance of cloud-free hill tops above 800m: 20%

Low cloud and visibility: Low cloud, base 500-700m, in association with the rain, with moderate visibility in heavy outbreaks.

Temperature: **Valleys:** Plus 6 rising to plus 10 Celsius.
At 800m: Plus 2 rising to plus 4 Celsius.
Freezing level: Above summits.

Mountain Weather Forecast

Ground Conditions Supplement
Date: Monday 3 April 2023 Location: Helvellyn summit at 11:50
Temperature: minus 0.8 C, Maximum wind speed 18.6 mph, Wind chill: minus 8.5 C, Average wind speed: 13.6 mph
Full report: As far as walkers are concerned, all the Lakeland fells and paths are now clear of snow. There are only small patches of snow remaining above 900m on steep north and east facing slopes (and these are probably now only to be found on the Helvellyn range) and they are nowhere where walkers are likely to cross them. Given the overnight frost, early walkers encountered patches of thin ice on paths where they cross drainage lines; but these had thawed by late morning/early afternoon. This situation is likely to be repeated on Tuesday. Rocks and paths were generally dry giving excellent traction and an enjoyable day out, especially for those attempting steep and exposed routes, such as the Helvellyn edges. Even on a day with relatively light winds, there was quite a contrast between the warm car parks in the valleys and the summit where the temperature around midday was just below freezing and the windchill (what the temperature actually feels like) a chilly minus 8 degrees C. This was especially noticed by those who had elected to climb Helvellyn without any extra clothing. This was a shame since the summit plateau today was a place to don an extra jacket and linger to soak in the magnificent 360 degree panorama. Therefore, for those venturing on the high fells, plenty of warm and waterproof (doubling as windproof) clothing, hat and gloves, mountain boots and equipment - including a torch, map and compass and the ability to use them in potentially poor visibility – all remain essential both for safety and to be able to fully enjoy the experience. Given the current forecast for Tuesday, both sunglasses and sunscreen will also be essential!
